

Farm Living is the Life for Me

Barn homes needed....

Barn cats help to earn their keep by:

- Controlling the rodent population
- Reducing your need to use mouse traps and poisons
- Saving you money on feed grain spoilage or loss

When a feral/semi-feral cat comes in, if there are farms available, we will sterilize the cat and place it in a welcoming barn. This program helps area farms and helps save the lives of cats in the shelter.

If you have a barn, please call or email – let us know how many barn cats you are able to provide a home for! No adoption fee, but donations are welcome to keep this program going.
